Friday, 06 November 2009

CLEARLAKE – Second Sunday Cinema's movie for this Sunday, Nov. 7, will be “Climate Engineers.”

The movie will be shown at Clearlake United Methodist Church at 14521 Pearl Ave. near Mullen in Clearlake. Doors open at 5:30 p.m. for snacks and socializing; the film starts at 6 p.m.

This is a Pacifica documentary produced and written by Geoff Brady of Pacifica's outstanding station, WBAI.

The footage in this film is a video and photographic document of high atmospheric aircraft activity and related weather control programs conducted over New York City from 2008 to 2009.

The film describes how our weather has been silently stolen without permission for the purposes of scientific experimentation and use by the military as a weapon of war.

Audio of NASA, U.C. Berkeley and Stanford scientists reveals the disconnect in their thinking as they casually discuss manipulating the climate to solve "Climate Change" and for use as a weapon, while ignoring the effects that dumping massive quantities of metal aerosols into the atmosphere will have Earth's life systems.

This serious and fascinating documentary does not indulge in conspiracy theories, but sticks to known facts, and speculations on what is happening.

Lake County resident and researcher Tom Slaight will introduce the film and will share about 10 minutes of his own video of similar if not identical emissions over Lake County. Slaight also will be available for discussion and a question and answer session following the film.
