LAKE COUNTY – The weekend weather for Lake County includes hot, sunny days with clear skies – perfect for all of your outdoor activities – and warm, clear evenings for enjoying sparkling fireworks throughout the county tonight and on Saturday.

Friday's high temperatures should be in the low- to mid- 90s, according to the National Weather Service (NWS) in Sacramento, with slight southerly breezes. Overnight temperatures are expected to reach the upper 50s.

On Saturday, Independence Day, NWS forecasts that the highs should top out around 94, with calm winds early that become breezier with westerly winds in the afternoon and early evening. Lows are predicted to reach the mid-50s.

Temperatures on Sunday will usher in a short cooling trend, with highs in the mid- to upper-80s and overnight lows in the mid-50s.

Monday through Wednesday, the NWS is forecasting daytimes highs to be in the low 80s to mid-70s, however The Weather Channel (TWC) predicts temperatures to remain closer to normal, in the mid- to upper 80s. Both agree that lows will remain in the mid-50s Monday through Wednesday.

Whatever the temperature, remember to have a safe July 4th weekend and enjoy the legal fireworks surrounding Clear Lake this weekend.
